IMPROVING YOUR WORKSPACE

All you need to make your vehicle workshop clean, safe and efficient

Improve your workshop

Exhaust and welding fumes, dust from sanding and grinding, oil spillage and untidy hoses - these are just some of the hazards in vehicle repair workshops, car inspection stations and alike. A prosperous business with a high-quality image is a question of a safe,

tidy and well-organized workshop. Nederman has cost-effective products and complete system solutions. We help you all the way, from designing and planning to installation, service and maintenance.

Nederman solutions mean:

Safe and ergonomic workplaces

No more injuries caused by tripping over tangled hoses and cables on the workshop floor.

Air, water, oil and power supplies are always readily available when and where you need them. And out of your way when you don't.

Less wear on equipment

Damage to hoses and cables is mainly caused by mechanical wear and tear. We make sure that no supply systems are left on the floor to be damaged by cars and trucks.

Improved health conditions and cleaner environment

Exhaust fumes, welding fumes, grinding dust, etc. are dangerous to health and reduce productivity. Our extraction solutions remove all these contaminants at source.

Better end-product quality

Grinding and sanding generate harmful dust. A clean environment is essential for the finish. Our vacuum cleaning systems keep your vehicles and premises clean and tidy.

General services and maintenance

Hose and cable reels improve ergonomics and make the workplace more efficient. Our supply systems for oil, grease and liquids gives each vehicle exactly the right amount and provides a reliable base for invoicing.

Exhaust extraction

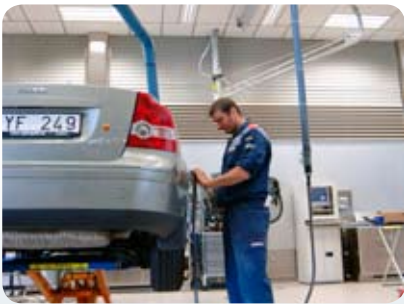

Exposure to exhaust fumes and diesel fumes can seriously affect health. Nederman systems extract exhaust fumes straight from the exhaust pipes and are available for all types of vehicles.

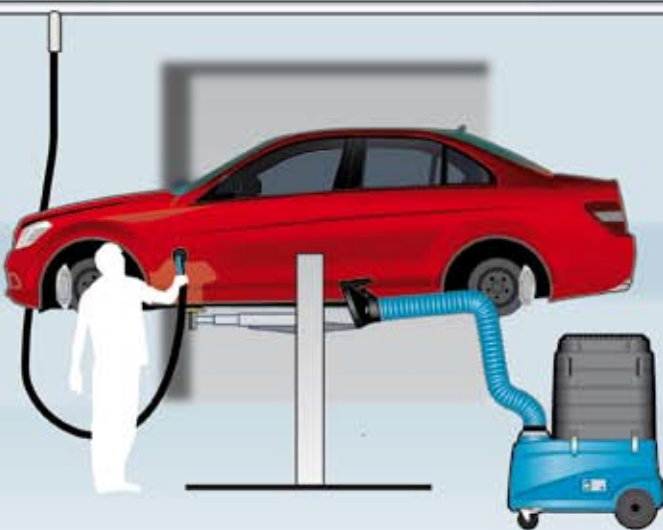

News!

Nederman now also has systems for dealing with oils, grease and different fluids. These are distributed from a central storage area to the vehicles and work stations where they are easily accessible from various hose reels. The systems also include equipment that makes working in oil pits cleaner and safer.

Bodywork repair

Cleaning

Welding, grinding, and cutting generate dust and particles that harm personnel and make vehicles and premises dirty. Nederman's systems clean the air before being released into the atmosphere or your premises.

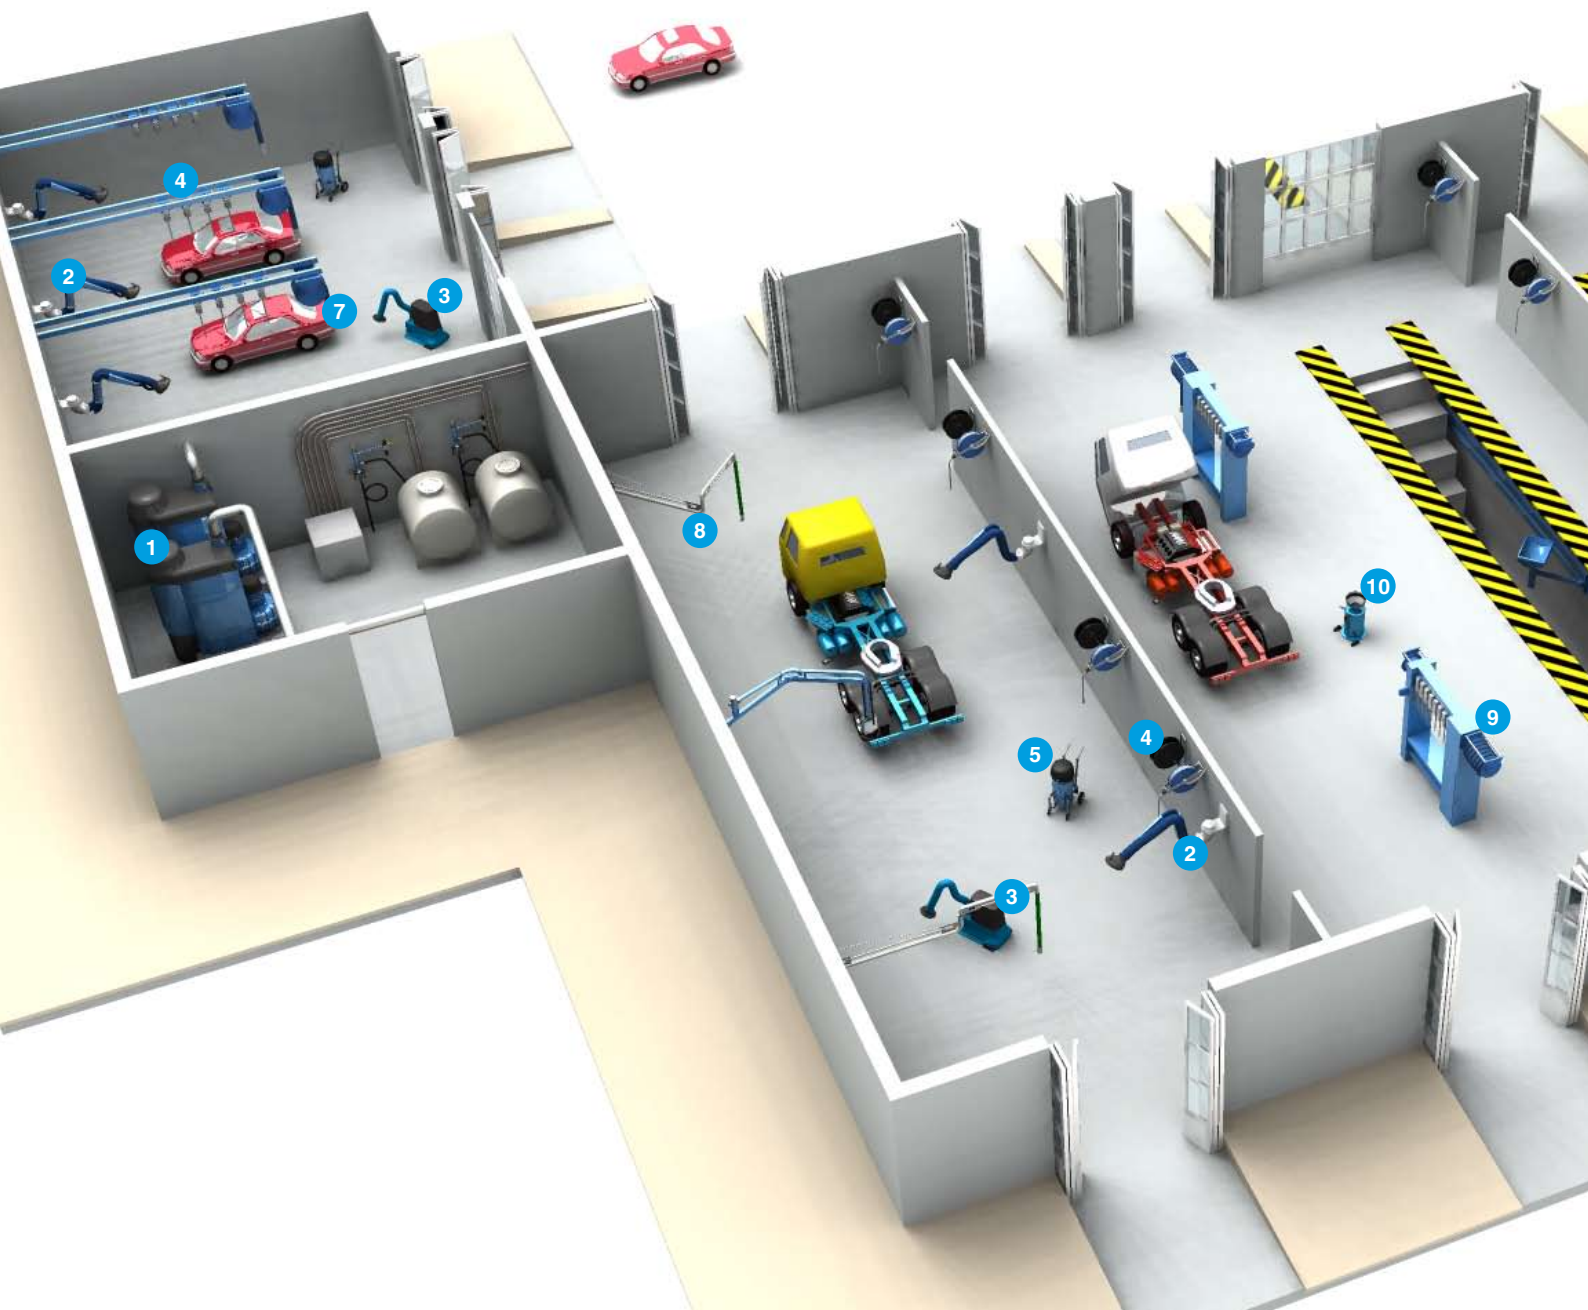

Central systems and mobile units make it easy to keep vehicles and premises clean and tidy. With power to pick up heavy particles, metal filings and broken glass.

For all types of vehicles For any kind of workshop

Nederman's products and systems can be used for all types of vehicle – from cars to heavy vehicles. Our solutions are therefore widely used in the automotive sector.

- *Automotive workshops/Service facilities for cars, trucks, construction machinery, agricultural machinery, etc*
- *Vehicle inspection stations*
- *Emergency service stations*
- *Military Vehicle Depots*

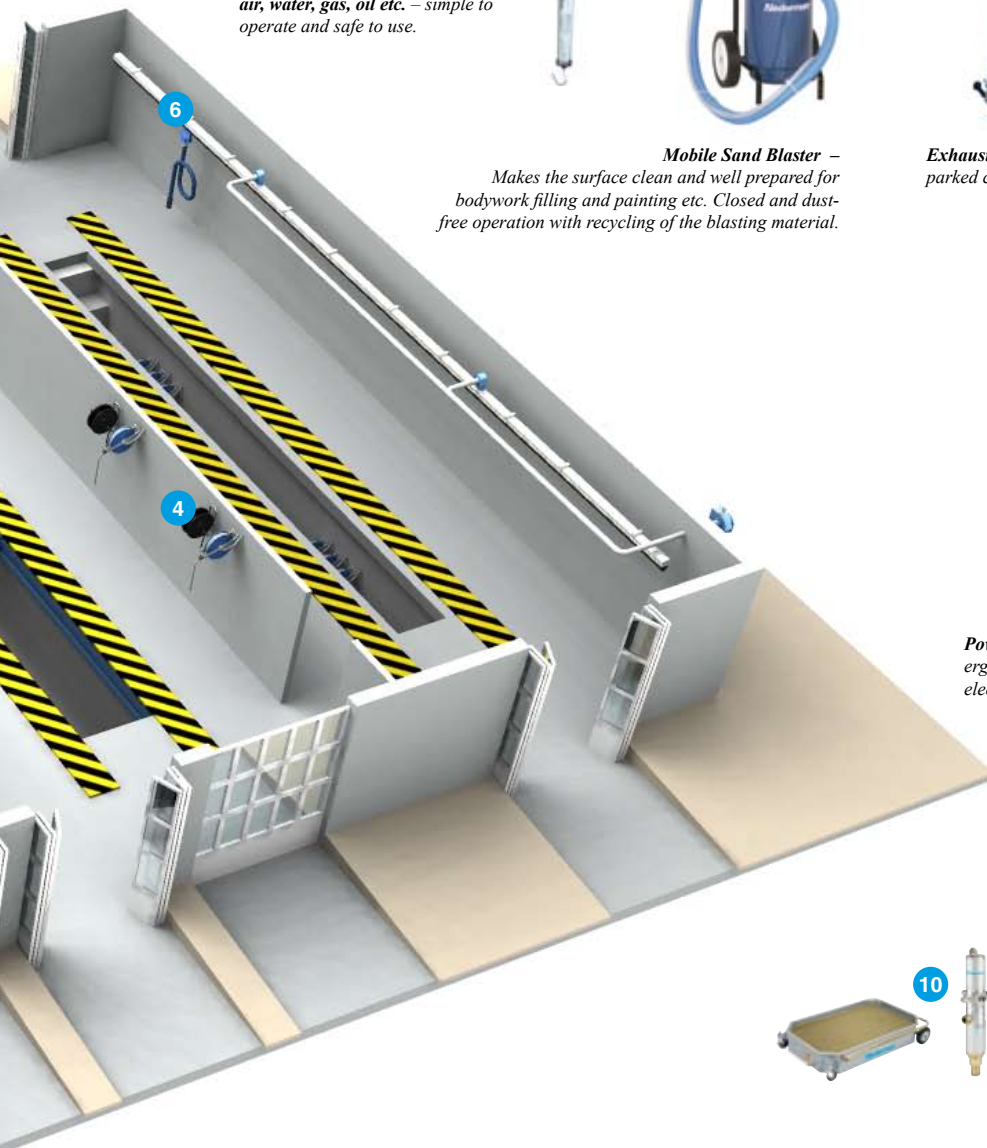

Extraction and filtering of welding fumes, dust, particles – Extraction and filtering systems based on high and low vacuum techniques cover central systems serving several extraction points to mobile units for flexible usage.

Cable reels and hose reels for air, water, gas, oil etc. – simple to operate and safe to use.

Mobile Sand Blaster – Makes the surface clean and well prepared for bodywork filling and painting etc. Closed and dust-free operation with recycling of the blasting material.

Exhaust extraction for all kind of vehicles – Exhaust hose reels for parked cars and rail systems for vehicles in motion.

Power Box and Swing Arm – Rationalize work and improve ergonomics with outlets for compressed air; vacuum and electricity accessible over large working areas.

Systems for grease, oil and other liquids – for rational and economic handling, and administration.

A partner you can rely on

Nederman has extensive experience of how to create the optimum working environment. This knowledge and experience are always accessible for you when you plan a new facility, or modernise an existing workshop. Our specialists and sales representatives know what is necessary for creating an efficient and profitable facility. They are backed by competent teams and central resources assisting in all phases of a project, from planning and design to installation and commissioning.

Bridging the complete product chain

At Nederman we have complete control of our products. We develop, design, and manufacture all our products ourselves. This means you are always ensured safe and reliable products, and you will always have access to personnel who know our products and systems. Therefore we are able to take full responsibility in making your workshop safe and environmentally friendly for many years.

Nederman offers

- *Own developed products based on effective technology*
- *Comprehensive product range*
- *Extensive experience of creating optimum working environment.*
- *Worldwide representation*

Long, fruitful cooperation with brand-leading manufacturers

After more than 60 years on the market Nederman has built up and established very good relationships with the automotive industry. We develop new products and systems together with leading auto manufacturers such as BMW, Mercedes, Volvo,

Toyota and many others. We get an invaluable input for our development phase and the opportunity to test and evaluate prototypes and systems. Together we develop solutions for cleaner, safer and more efficient workshops.

Bringing good conditions to workplaces and the environment

For more than 60 years Nederman has developed, manufactured and marketed products and system solutions to reduce the strain on the environment and improve working conditions in numerous industries.

We have a profound technical competence and an extensive know-how. Our sales organization is well acquainted with international and local environmental restrictions and health-related legislations. We take full responsibility from system design to maintenance.
